During the COVID-19 pandemic, wearing masks, regularly washing hands, and using hand sanitizers are not enough to keep us safe.

**Personal Belongings**

**Jewellery, Cosmetics  
& Toys**

**Currency, Stationery  
& Groceries**

To enhance protection and to prevent the virus from spreading, we also need to sanitize our personal and household belongings. To keep us and our surroundings safe from any surface transmitted virus and bacteria, we are happy to introduce our **UV Disinfecting Oven**.

## UV DISINFECTING OVEN

Our UV Disinfecting Oven emits ultraviolet light precisely at 253.7 nanometers, which falls under the germicidal wavelength of ultraviolet light. It deactivates the DNA of bacteria, viruses & other pathogens, thus putting a stop to their ability to multiply and cause diseases. Our ovens can be primarily useful for sterilization of the surface of various objects and materials.

With the current scenario of the world, our UV Disinfecting Oven shall prove to be very useful in the fight against Covid-19 and keep our near and dear ones safe.

The oven can be useful in Office Spaces, Factories, Shops, Saloons, Hospitals, Airports, and at Home. Oven can be used for all kinds of toys, currency, stationery, groceries, jewellery, cosmetics & personal belongings etc.

## Safety Measures

- ✓ Avoid direct UV light exposure to skin and eyes and keep away from children.
- ✓ Only insert and take out objects when the UV light is switched off.
- ✓ Ensure the door is shut correctly before using the oven and avoid opening it when the UV light is on.
- ✓ For optimum results, avoid stacking objects on top of each other & place them at sufficient distances.
- ✓ In the case of food spills, keep the oven walls and trays dry by wiping with a dry cloth.
